

LAB # 10

1. Set up execution profile for QA environments and run tasks(below) under QA profile.

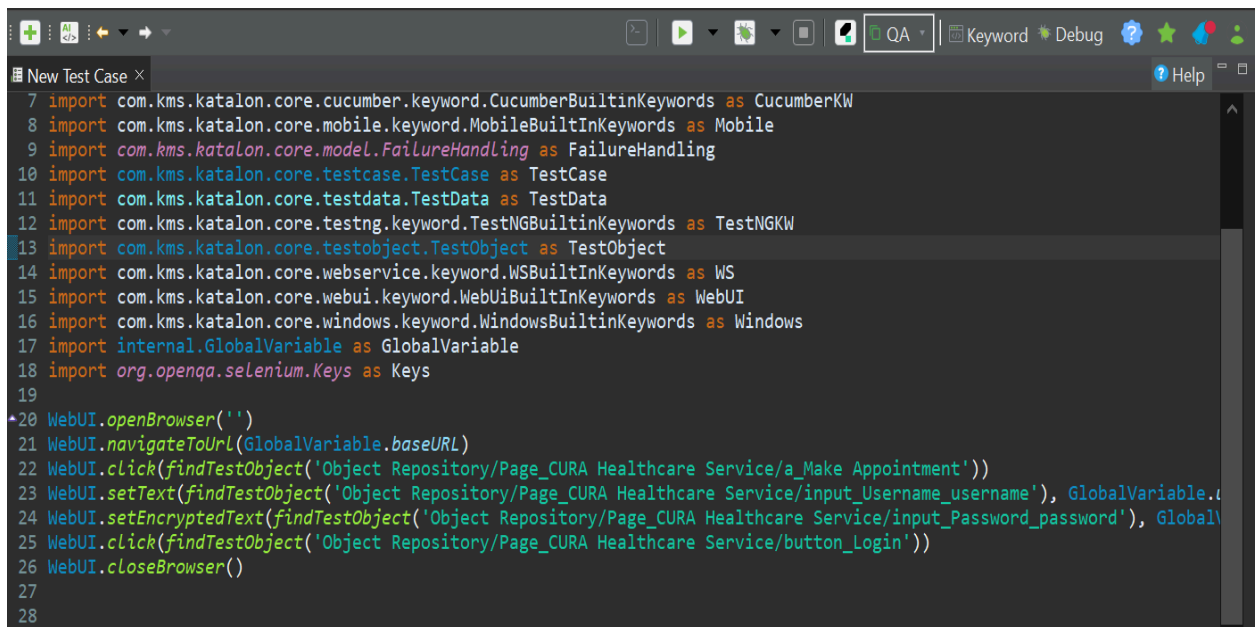

2. Define global variables for base URL, login credentials, use it in a testcase and execute.

QA PROFILE

TEST CASE

3. Run the same test case under different profiles and compare responses

Profile 1 (QA) Execution Report

login

Execution Environment

Host name	lenovo - DESKTOP-F32M7V4.mshome.net
Local OS	Windows 10 64bit
Katalon version	10.1.0.223
Browser	Chrome 135.0.7049.116
Device name	

Summary

ID	Test Suites/login		
Description			
Total	1		
Passed	1	Failed	0
Error	0	Incomplete	0
Skipped	0		
Start	06-05-2025 15:40:00	End	06-05-2025 15:40:17
Elapsed	16.951s		

#	ID	Description	Status
1	Test Cases/New Test Case		PASSED

Profile 2 (Default) Execution Report

login

Execution Environment

Host name	lenovo - DESKTOP-F32M7V4.mshome.net
Local OS	Windows 10 64bit
Katalon version	10.1.0.223
Browser	Chrome 135.0.7049.116
Device name	

Summary

ID	Test Suites/login		
Description			
Total	1		
Passed	0	Failed	1
Error	0	Incomplete	0
Skipped	0

#	ID	Description	Status
1	Test Cases/New Test Case		FAILED

4. Create local variables for appointment time slots during test case execution.

No.	Name	Type	Default value
1	appointmentDate	String	"30/04/2025"

```

WebUI.openBrowser('')
WebUI.navigateToUrl('http://demoaut.katalon.com/')
def var1 = WebUI.getText(findTestObject('Page_CURA_Healthcare/a_Make Appointment'))
WebUI.click(findTestObject('Page_CURA_Healthcare/a_Make Appointment'))
WebUI.setText(findTestObject('Page_CURA_Healthcare/input_username_username'), GlobalVariable.username)
WebUI.setText(findTestObject('Page_CURA_Healthcare/input_Password_password'), GlobalVariable.password)
WebUI.click(findTestObject('Page_CURA_Healthcare/button_Login'))
WebUI.waitForElementPresent(findTestObject('Page_CURA_Healthcare/select_Tokyo CURA Healthcare Center'), 10)
WebUI.doubleClick(findTestObject('Page_CURA_Healthcare/select_Tokyo CURA Healthcare Center'))
boolean is_readmission = true
if (is_readmission == true) {
    WebUI.check(findTestObject('Page_CURA_Healthcare/input_Readmission'))
} else {
    WebUI.uncheck(findTestObject('Page_CURA_Healthcare/input_Readmission'))
}
WebUI.click(findTestObject('Page_CURA_Healthcare/input_None_programs'))
WebUI.setText(findTestObject('Page_CURA_Healthcare/input_Visit Date (Required)_visit_date'), GlobalVariable.appointment_date)
WebUI.setText(findTestObject('Page_CURA_Healthcare/textarea_Comment_comment'), 'make a appiontmeny')
WebUI.click(findTestObject('Page_CURA_Healthcare/button_Book Appointment'))
WebUI.takeScreenshot('D:/Downloads/book_appointment_result.png')
WebUI.closeBrowser()

```

Appointment Confirmation

Please be informed that your appointment has been booked as following:

Facility	Tokyo CURA Healthcare Center
Apply for hospital readmission	No
Healthcare Program	Medicare
Visit Date	30/04/2025
Comment	make appiontment

[Go to Homepage](#)

5. Simulate failed login attempts with incorrect credentials — catch authentication exceptions.

```

WebUI.openBrowser('')
WebUI.navigateToUrl('http://demoaut.katalon.com/')
WebUI.click(findTestObject('Page_CURA_Healthcare/a_Make Appointment'))
WebUI.setText(findTestObject('Page_CURA_Healthcare/input_Username_username'), 'wrongUser')
WebUI.setText(findTestObject('Page_CURA_Healthcare/input_Password_password'), 'wrongPassword')
WebUI.click(findTestObject('Page_CURA_Healthcare/button_Login'))
try {
    WebUI.waitForElementPresent(findTestObject('Page_CURA_Healthcare/select_Tokyo CURA Healthcare Center'), 5)
    println("Login succeeded (unexpectedly) with incorrect credentials.")
} catch (StepFailedException e) {
    println("Login failed as expected. Authentication exception caught.")
    WebUI.comment("Login failed with invalid credentials.")
}
if (WebUI.verifyTextPresent('Login failed! Please ensure the username and password are valid.', false)) {
    WebUI.comment('Error message displayed correctly.')
} else {
    WebUI.comment('Error message NOT displayed as expected.')
}
WebUI.closeBrowser()

```

6. Attempt booking with invalid data (e.g., empty fields, past date) — validate input exceptions.

```

WebUI.openBrowser('')
WebUI.navigateToUrl(Global.baseURL)
WebUI.click(findTestObject('Page_CURA_Healthcare Service/a_Make Appointment'))

wrongCredentials = [
    [user: 'shehnila', pass: '223shenar'],
    [user: 'javeria', pass: 'javeria123']
]

wrongCredentials.each { creds ->
    try {
        WebUI.setText(findTestObject('Page_CURA_Healthcare Service/input_Username_username'), creds.user)
        WebUI.setText(findTestObject('Page_CURA_Healthcare Service/input_Password_password'), creds.pass)
        WebUI.click(findTestObject('Page_CURA_Healthcare Service/button_Login'))
    }
}

```

```

WebUI.waitForElementVisible(
    findTestObject('Page_CURA_Healthcare Service/p_Login failed Please ensure the username and password are valid'), 5)

WebUI.verifyElementVisible(
    findTestObject('Page_CURA_Healthcare Service/p_Login failed Please ensure the username and password are valid'),
    FailureHandling.STOP_ON_FAILURE)

println "Invalid login caught for ${creds.user}/${creds.pass}"
WebUI.takeScreenshot('D:/Downloads/login_failed.png')

} catch (StepFailedException e) {
    println "Exception during login attempt: ${e.message}"
}

WebUI.closeBrowser()

```

```
